Dedicated and quick-learning Computing and Information Technologies student pursuing a career in Software Engineering. I've been actively educated in software development every year since 2017, with two 14-week paid co-ops providing hands-on experience in full-stack development.

EXPERIENCE

Discovery Machine Inc, Williamsport, PA— Software Engineer Intern *(August 2024 - December 2024)*

- Collaborated with a project team to design and develop a cross-platform mobile application using Flutter/Dart
- Implemented a RESTful API to integrate backend functionality with the application's front-end interface
- Gained practical experience rapidly learning new frameworks and technologies while enhancing teamwork and problem-solving within a fast-paced agile environment

Chameleon Consulting Group, Remote/Herndon, VA— Software Engineering Co-op *(August 2023 - December 2023)*

- Engineered solutions for cloud deployments using Terraform, Bicep, and ARM, while developing backend components and automation scripts leveraging Go and Python
- Utilized Docker for containerization to ensure consistency across development, testing, and production environments
- Adapted to and practiced Agile development methodologies while collaborating closely with a team of full-time engineers

Camp Seneca Lake, Penn Yan, NY— *Various Roles (Summer 2021 - Present)*

Held roles including bunk counselor, assistant Unit Head, Unit Head, and Pool Director.

- Directed all pool operations (Summer 2025 role) including the supervision of lifeguards, managing DOH compliance, chemical testing, and swim lesson programming
- Supervised 20–55 campers and led teams of up to 20 staff, focusing on team development, safety, and positive outcomes
- Contributed to year-round strategic initiatives as a 3-year member of the Seasonal Leadership Team

EDUCATION

Rochester Institute of Technology, Rochester, NY— *BS in Computing and Information Technologies*

August 2021 - May 2026

Minor in Software Engineering, immersion in Creative Writing

SKILLS

PROGRAMMING LANGUAGES: Python, Java, JS, Go, C#, Dart

FRAMEWORKS/LIBRARIES: Spring Boot, React, Node.js, Angular, Flutter, HTML, CSS, TypeScript

CLOUD/DEVOPS: AWS, Azure, Docker, Terraform, Git, Bash

ARCHITECTURE: Design Patterns, Object-Oriented Design (OOD), REST API, JSON

DATABASE/QA: SQL, Oracle, ODBC/JDBC, JUnit, Pytest

PROJECT HIGHLIGHTS

U-Fund Website: Developed a full-stack financial application, leveraging Spring Boot to build a REST API backend and Angular (HTML/CSS) for the dynamic front-end interface

Command Line Wordle: Developed a text-based version of the popular game in Java, applying Object-Oriented Programming principles to manage game logic and user input processing

Mario Kart Character Picker: Developed a responsive JavaScript web app to filter and select Mario Kart characters based on performance statistics, showcasing dynamic DOM manipulation
