EDUCATION

Drexel University — Philadelphia, PA
Master of Science in Artificial Intelligence and Machine Learning — (Expected Graduation: Jun 2028)

Rochester Institute of Technology — Rochester, NY
Bachelor of Science in Computing and Information Technologies — (Graduated: May 2026)
(Minor: Software Engineering) — GPA: 3.41

SKILLS

- **Programming Languages:** Python / Java / TypeScript / JavaScript / C# / Dart / HTML / CSS
- **Frameworks / Libraries:** React / Node.js / Flutter / BLoC / Flask / FastAPI / Spring Boot / Angular / ASP.NET MVC
- **Cloud / DevOps:** Azure / Bicep / Docker / GitLab Pipelines / Git / Bash
- **Architecture / APIs:** REST API / JSON / Design Patterns / Object-Oriented Design
- **Databases / Data / Testing:** SQL / Oracle / ODBC / JDBC / NumPy / JUnit / Pytest

EXPERIENCE

Camp Seneca Lake — Penn Yan, NY
Counselor to Operations and Logistics Manager / Pool Director — (Jun 2021 – Present)

- Developed React and TypeScript bunk scheduler replacing an estimated 50-hour spreadsheet process, now used camp-wide by 30 bunks
- Engineered React and TypeScript on-duty scheduler using constrained-search algorithm to generate fair staff rosters
- Mentored 20–25 staff each summer as Unit Head, leading villages to camp-leading camper satisfaction scores in 2023 and 2024

Discovery Machine, Inc. — Williamsport, PA
Software Engineer Intern — (Aug 2024 – Dec 2024)

- Developed majority of cross-platform USAF application in Flutter and Dart from design mockups, with work later deployed
- Connected Flutter widgets to backend via RESTful API integration and Dart BLoC data streams, enabling UI-backend communication
- Implemented interactive training map on custom company tiles, letting users set waypoints, create routes, and draw shapes
- Revised Flutter and Dart implementation based on mentor feedback to match team's design vision

Chameleon Consulting Group LLC — Herndon, VA
Software Engineer Intern — (Aug 2023 – Dec 2023)

- Automated virtual machine spin-up in Docker containers as a solo project, presented to the entire company at internship end
- Modified existing Flask API in an air-gapped environment, delivering customer-requested changes on quick-turn requests
- Scripted deployment setup in Bash for multiple team projects, replacing manual configuration steps
- Configured GitLab pipelines with full-time engineers to automate builds and tests, removing manual build runs

PROJECTS

NHL Draft Lottery Simulator — Philadelphia, PA
Personal Project, Developer — (Apr 2026 – Present)

- Built React and TypeScript web application simulating full NHL lottery rules with animated ball draws and a first-round mock draft
- Integrated live NHL standings refreshed one to two times daily to generate current reverse-standings draft order
- Expanded simulator for 2027 draft with second-round support, locked draft order, and rankings of 80 prospects
- Designed simulator's user interface, deployed live at nhlmock.joshbcohn.com

Beehive Monitoring System, Rochester Institute of Technology — Rochester, NY
Lead Frontend Developer, Senior Capstone Team of 6 — (Completed: May 2026)

- Led frontend design in React, TypeScript, and Vite for dashboard showing hive temperature, humidity, and CO2 every 10 minutes
- Developed 18 of 34 React and TypeScript frontend components and pages for the sensor dashboard
- Standardized frontend components across parallel development tracks to keep teammates' work consistent
- Connected frontend to REST API, displaying live sensor data from hardware on a real beehive

RELEVANT COURSEWORK

- Software Design Principles and Patterns / Engineering of Software Subsystems / Software Process and Project Management
- Human-Centered Requirements and Design / Database Application Development / Client Programming / Server Programming
- AI for Programmers / Introduction to Artificial Intelligence (in progress) / Introduction to Machine Learning (in progress)

AWARDS

- **Cum Laude**, Rochester Institute of Technology (May 2026) / **Dean's List**, Rochester Institute of Technology (5 Semesters)

MEMBERSHIPS

- **Member and Treasurer**, Sports Fans of RIT, Rochester Institute of Technology (Jan 2023 – May 2026)
